Check point #1

The screenshot displays the Apache Airflow web interface. At the top, there's a navigation bar with links for DAGs, Security, Browse, Admin, and Docs. Below this, the 'DAGs' section is active, showing a list of DAGs. The table has columns for DAG, Owner, Runs, Schedule, Last Run, Recent Tasks, Actions, and Links. The DAGs listed are example_bash_operator, example_branch_datetime_operator_2, example_branch_dop_operator_v3, example_branch_labels, example_branch_operator, example_complex, example_dag_decorator, example_external_task_marker_child, example_external_task_marker_parent, example_kubernetes_executor, and example_kubernetes_executor_config. The browser's address bar shows 'localhost:8080/home' and the time is 06:40 UTC.
